Hello to all our Members. The Board of Directors hopes all are staying safe and healthy.

With the current restrictions of gatherings and social distancing, we currently anticipate opening the Club around June 1st, 2020. Once the Government restrictions are lifted and additional guidance concerning gatherings and social distancing requirements are announced, we still need to prepare the facility for opening. These opening actions take several weeks in order to prepare the pools and grounds for opening.

Additionally, due to the quarantine, we do not anticipate having lifeguards this year since they have been unable to get certified up to this point. We will attempt to fill some shifts with previously trained lifeguards, however we currently do not know if this is feasible.

Furthermore, the Board of Directors will still need to discuss many possibilities including limiting the number of persons allowed within the club, potential need for disinfecting actions in and around the club facilities including hand sanitizer stations. We will also discuss fees for this season. We want to ensure our patrons the water itself is always maintained at or above CDC recommended Chlorine and Bromine levels for public access pools.

We will continue following the Federal, State, and Local Government recommended restrictions along with CDC best practices. In closing, we will be sending out a Survey to measure the potential numbers of memberships return this year. We understand many people are currently in a financial quandary and may not be able to re-join this year. Please take the time to complete the survey to assist us in planning our future.

Sincerely,
Clifford Meyers
President of the Board
